PROFILE

I am a software developer and tester, mainly experienced in backend development: I have built applications on Java (WildFly, JaxRS, REST) and PHP, with a MySQL database. I have a strong commitment to agile ways of working and Scrum (PSM I certification). I am open to new opportunities and I value responsible, transparent work.

PERSONAL DETAILS

Date and place of birth: 6 January 2005, Veszprém
Languages: English B2 (advanced school-leaving exam); Hungarian — native
Driving licence: Category B

EXPERIENCE

Informatics Sectoral Training Center — Teaching Aug 2025 - present
• Teaching.

HelixLab — Development Aug 2025 - present
• Building various applications.

HelixLab — Internship Jan 2024 - June 2025
• Professional internship on real development projects.

EDUCATION

Apáczai Csere János Technical School, Dombóvár 2023 - 2025
• Software developer & tester qualification.

Illyés Gyula Grammar School, Dombóvár 2019 - 2023
• School-leaving exam — advanced English and advanced PE.

TECHNOLOGIES

Backend & database

- Java — with WildFly server
- PHP — with Laravel framework
- MySQL — in a MAMP environment

Frontend & tools

- HTML, CSS, JavaScript + Bootstrap 5
- Angular framework
- GitHub · Jira · Postman
- Scrum and agile methodology
- Artificial intelligence — automation, agentic coding (Claude)

PROJECTS

Fanni Lashes — online booking web application

Angular · Supabase · PostgreSQL

- A live, client-facing full-stack project: a lash studio website with an online booking system and a full admin panel (bookings, price list, opening hours, gallery, statistics). Four-step booking wizard with real-time availability calculation; the booking logic lives in PL/pgSQL functions, with database-level double-booking protection via an exclusion constraint and Row Level Security on every table — without a dedicated backend server.

IAKK Dashboard

PHP

- The IAKK Dashboard is an interface very similar to KRÉTA (the Hungarian school administration system) — a more advanced take on it. The dashboard manages student-related information (e.g. attendance matrix, holidays, sick leave). It has a built-in payment system and can export various documents. I gained PHP experience on this project.

Visuelse

Java · JaxRS

- A dashboard application developed for a construction company, in which I built the Excel and PDF generation and export features in Java (JaxRS).

Document processing system

PDF · Data extraction

- Automatic processing of documents: extracting structured data, keyword search within the content and dynamic PDF generation.

CERTIFICATES

Professional Scrum Master I (PSM I)

- Certification earned independently, in English.

Software Developer & Tester

- State-accredited technician qualification.

Web Design

- Web design course certificate.

INTERESTS

Scrum Master

- Strong affinity for the Scrum Master role.

Databases (MySQL)

- Beyond development, I have also worked with databases.

Artificial Intelligence

- I have experience with agentic coding (Claude) and with designing project-based agents.

STRENGTHS

Eagerness to grow · Flexibility · Openness · Adaptability

HOBBY & SPORTS ACHIEVEMENTS

My hobby is football — I currently play in a county first-division team in Dombóvár, and I have also played in the NB III. Football keeps my body and mind in balance and taught me how to cooperate in a team.

Tolna County Division I — champion team

2024 - 2025

National Boys Futsal Championship — 1st place

2015 - 2016

Youth Football Festival, Kaposvár — 1st place (international)

2016

KOMM MIT Tournament, Barcelona — 2nd place (international)

2011
